

RangeBreakout Bot — Setup Guide

Overview

RangeBreakoutBot is an automated trading system that identifies a price range during specific hours and places trades when price breaks out of that range. It is designed to be simple to use — just attach it to a 1-minute (M1) chart and let it run.

Inputs & Parameters

Risk per trade

Description: Percentage of your account balance to risk per trade.

Default: 1.0

Example: If your balance is \$10,000 and RiskPercent = 1.0, the EA will risk \$100 per trade.

Magic

Unique identifier for the bot's trades.

If you run multiple EAs on the same account, make sure each has a different Magic number.

Time Settings (GMT+3 Reference)

RangeStartHour / RangeStartMin

Defines when the bot starts recording prices to calculate the range.

Example: 3:00 means the range starts at 03:00 GMT+3.

RangeEndHour / RangeEndMin

Defines when the range ends.

Example: 6:00 means the range is completed at 06:00 GMT+3.

TradingEndHour / TradingEndMin

Defines when trading stops and all open positions are closed.

Example: 18:55 → all trades are closed at 18:55 GMT+3.

Recommended Settings (GMT+3 Reference)

Symbol	Range Start	Range End	Trading Close
USDJPY	3:00	06:00	18:00
GBPUSD	3:00	10:30	18:00
EURJPY	2:00	10:00	18:00
XAUUSD	3:00	06:00	18:55
EURUSD	3:00	10:00	20:00
